

ML Products & Platforms

Accelerate Innovation with Custom AI Solutions and ML Platforms

Overview

Durga Analytics helps you build and scale ML-powered products and platforms that deliver business value at scale—from personalization engines to fraud detection hubs and intelligent assistants.

What We Build

- Custom ML products (e.g., pricing engines, risk scoring, chatbots)
- Domain-specific ML platforms (e.g., underwriting, diagnostics)
- Recommendation systems and customer intelligence hubs
- Computer vision and NLP-based applications
- End-to-end MLOps platforms using open-source and cloud-native tools

Build-to-Scale Framework

- 
1. **Ideation:** Align product vision with AI feasibility
 2. **MVP Delivery:** Deliver working product with feedback loops
 3. **Platformization:** Extend capabilities with APIs, UI, and governance
 4. **Scaling:** Monitor usage, expand features, optimize cost and performance

Benefits

- Faster innovation cycles and AI-enabled business models
- Platform thinking—reuse, extensibility, modularity
- Ready-to-integrate accelerators and frameworks
- Proven delivery across industries with pre-built assets

Success Stories

- Built a multilingual document summarization engine using LLMs for a legal tech firm
- Deployed dynamic pricing engine integrated into CRM for a retail chain
- Launched a fully managed MLOps platform using open-source stack for an insurtech startup
